Subject: hyperion air permit

Dear Sirs,

I am quickly writing to voice my opposition to the rushing of permits for Hyperion. First and foremost there has been NO enviromental impact study done. It is insane to think we would be giving a permit to anyone when this hasnt been done.

Please represent the residents of this state properly by protecting them. At the very least a EIS needs to be done before any more of could be moved forward.

Thank you for your time.
